

Dr. Selim Can Hotinli

Personal details

<i>Address</i>	Office 234 Perimeter Institute 31 Caroline St N Waterloo ON N2L 2Y5, Canada
<i>Mobile</i>	+1 (226)-750-7174
<i>E-Mail</i>	selimcanhotinli@gmail.com

Professional

P. J. E. Peebles Senior Postdoctoral Fellow Perimeter Institute for Theoretical Physics	October 2023 –
Horizon Fellow in Cosmology and Gravitation Johns Hopkins University	February 2021 – 2023
Postdoctoral Fellow* Imperial College London	October 2020 – 2021
*A post-doctorate position until my delayed start at Johns Hopkins due to COVID19 travel restrictions.	

Education

Imperial College London PhD in Physics, Thesis Advisor: Andrew Jaffe Thesis Subject: Modern Cosmology in the post-Planck era.	2016-2020
Imperial College London MSc in Physics (Distinction), Thesis Advisor: Andrew Jaffe and Carlo Contaldi Thesis Subject: Effects of quenched disorder in the early Universe.	2014-2016
Bosphorus University BSc in Physics (First Class), Advisor: Erkcan Ozcan (CERN)	2009-2014

Positions Held

Co-lead-editor: ‘Review of the new discoveries in the era of low noise high resolution CMB experiments’ Co-leading an ambitious review project—to be published at the Elsevier, Physics Reports—with over 25 contributing authors.	June 2022 –
Visitor, Aspen Centre of Physics Aspen, CO 81611, United States	August 2023-September 2023
Organizer: Johns Hopkins University theory group seminars Co-organizer: Space Telescope Institute Colloquium Johns Hopkins University, Baltimore, MD 21218, USA	May 2022 – October 2023
Representative: EDI Committee Johns Hopkins University, Baltimore, MD 21218, USA	February 2021 – October 2023
Visitor, Aspen Centre of Physics Aspen, CO 81611, United States	August 2021-September 2021
Graduate Fellow, Perimeter Waterloo, ON N2L 2Y5, Canada	October 2019-February 2020
Visiting JRF, Johns Hopkins University (JHU) Baltimore, MD 21218, USA	February 2019
Visitor, Center for Computational Astrophysics (CCA) Flatiron Institute, 162-5th Ave, New York, NY 10010	Summer 2018
Visitor, Canadian Institute of Theoretical Astrophysics (CITA) Research assistant in cosmology, Imperial College London Blackett Building, Imperial College London, London, UK, SW7 2BX	2017 and 2018 Summer 2015

Summer research assistant, DESY Notkestraße 85, 22607 Hamburg, Germany	Summer 2013
Group member and research assistant, Cavendish Laboratory Atomic, Mesoscopic and Optical Physics Group (AMOP), Rutherford Building, JJ Thomson Ave, Cambridge CB3 0HE, United Kingdom	Summer 2012

Notable Awards and Grants

P. J. E. Peebles Senior Postdoctoral Fellowship	2023 –
Johns Hopkins Horizon Fellowship	2020 – 2023
Aspen Center of Physics <i>stipend for travel and coverage</i>	2021 (and 2023)
Balzan Foundations Fellowship <i>stipend from New-College-Oxford/Johns-Hopkins Centre for Cosmological Studies</i>	2019
Imperial College President's Scholarship Prize Scholarship.	2016-2020

Memberships

CMB-S4 member Active independent member.	2021 –
Simons Observatory member Active member.	2018 –

Co-advising

Nanoom Lee (PhD candidate NYU) nanoom.lee@nyu.edu	2022 –
Neha Anil Kumar (PhD candidate, JHU) nanilku1@jhu.edu	2022 –
Mesut Caliskan (PhD candidate, JHU) caliskan@jhu.edu	2022 –
Avery Tishue (PhD, Dartmouth) avery.tishue.gr@dartmouth.edu	2022 –
Jaxon North (Undergraduate student, JHU)	2022

Talks and Seminars

4 Conferences Kyoto, Flatiron Institute, UCSD, Montreal.	2022-2023
Invited Talk and Interview, Boston University Shortlisted candidate talk for tenure-track assistant professorship in cosmology.	February 2023
12 Invited Talks Kavli Institute for Particle Astrophysics and Cosmology (KIPAC) at Stanford, Max Planck Institute, Munich, Germany, Cornell University, University of Maryland College Park. Perimeter. University of Southern California. Columbia University, UC Berkeley. University of Sussex.	2019-2023
13 seminars given in Europe, USA and Canada	February-September 2019
Talk, NanoGrav meeting	April 2019
Talk, CMB in high definition workshop, CCA, Flatiron Institute, NYC. December 2018	
Co-organizer, Imperial College London weekly cosmology seminars.	2016-2019
8 seminars given in Canada and United Kingdom	2017-2019
C/C++, Python, Fortran, Mathematica, Julia	Advanced

Public codes: ReCCO, class_delens, FisherLens

Refereed Journals: PRL, PRD, JCAP, APJ, OJA

Publications

As of December 2023, I have authored over 35 research papers that contributed to the science case of the upcoming CMB and LSS surveys in novel ways. Limiting to my papers with less than 10 authors; I have collaborated with over 40 academics, while with over 13 (7), I have produced two (three) or more papers. My h-index as of December 2023 is 17.

I co-developed two public forecasting codes for improved calculation of CMB spectra [13] a public software that generates cosmological simulations and utilises quadratic estimators for reconstructing cosmological fields from small-scale LSS-CMB cross-correlation [14], and a public software framework for exploring connections between cosmology and particle physics [26]. The first three of these codes are now becoming parts of the analysis pipelines of upcoming CMB experiments.

My research so far contributed to the demonstration of the detectability and scientific value of a multitude of CMB signals including the weak gravitational lensing [1,5,16], kinetic and polarised Sunyaev Zel'dovich effects [8-14,17,21,24] and the moving-lens effect [6,19,23,26], providing robust tools and formalism to analyse CMB-LSS cross-correlations and open new windows of observation into unexplored epochs of structure formation such as the epoch of helium reionization, which has significant implications of early galaxy formation, quasar astrophysics and cosmology [2,8,9].

Contribution: Edited part of Section 2.1.3 titled ‘*Cosmic velocity fields with the kSZ and moving lens effects*’. Provided the analysis that produced Figure 4, and produced Figure 4.

Please see arXiv and inspsire for a more complete list.
